

BOLERO HUMMINGBIRD MINT

AGASTACHE 'BOLERO'

FROM A TUFT OF BRONZY, MINT-LIKE FOLIAGE, COME FEATHERY SPIKES OF SUMMERTIME BLOSSOMS THAT ATTRACT POLLINATORS BY THE DROVES. WITH PURPLE-PINK WANDS WAVING ABOVE THE FRAGRANT LEAVES, THE WHOLE PLANT REACHES AROUND 16" TALL AND WIDE IN BLOOM. DEER RESISTANT, DROUGHT AND HEAT TOLERANT, AND LONG BLOOMING, IT IS A PERENNIAL THAT IS EASY TO ADD TO THE GARDEN AND WOULD BE A NICE ADDITION TO THE HERB GARDEN. BOTH FOLIAGE AND FLOWER ARE EDIBLE AND HAVE A FLAVOR SOMEWHERE BETWEEN LICORICE AND MINT- A NICE ADDITION TO HERBAL TEAS AND POTPOURRIS. THE TUBULAR BLOSSOMS ARE HIGHLY ATTRACTIVE TO HUMMINGBIRDS AND THEIR PARTICULAR SHADE OF FUCHSIA LOOKS ESPECIALLY STUNNING NEXT TO ANYTHING CHARTREUSE! A GREAT PLANT FOR CONTAINERS AND MAKES A NICE CUT FLOWER

USDA ZONES 5-10
